## CMOS Analog Multiplexers

### Features

- Low Power Consumption
- TTL and CMOS-Compatible Address and Enable Inputs
- 44V Maximum Power Supply Rating
- High Latch-Up Immunity
- Break-Before-Make Switching
- Alternate Source

### Applications

- Data Acquisition Systems
- Communication Systems
- Signal Multiplexing/Demultiplexing
- Audio Signal Multiplexing

### Description

The DG506A, DG507A, DG508A and DG509A are CMOS Monolithic 16-Channel/Dual 8-Channel and 8-Channel/Dual 4-Channel Analog Multiplexers, which can also be used as demultiplexers. An enable input is provided. When the enable input is high, a channel is selected by the address inputs, and when low, all channels are off.

A channel in the ON state conducts current equally well in both directions. In the OFF state each channel blocks voltages up to the supply rails. The address inputs and the enable input are TTL and CMOS compatible over the full specified operating temperature range.

The DG506A, DG507A, DG508A and DG509A are pinout compatible with the industry standard devices.

**CAUTION:** Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

### NOTES:

1. Signals on V<sub>S</sub>, V<sub>D</sub> or V<sub>IN</sub> exceeding V+ or V- will be clamped by internal diodes. Limit diode forward current to maximum current ratings.
2.  $\theta_{JA}$  is measured with the component mounted on an evaluation PC board in free air.

**NOTES:**

1. Typical values are for design aid only, not guaranteed and not subject to production testing.
2. The algebraic convention whereby the most negative value is a minimum, and the most positive value is a maximum, is used in this data sheet.
3. Off isolation =  $20\log |V_S|/|V_D|$ , where  $V_S$  = input to Off switch, and  $V_D$  = output due to  $V_S$ .
4.  $I_{D(ON)}$  is leakage from driver into "ON" switch.
5. Parameter not tested. Parameter guaranteed by design or characterization.

### PASSIVATION:

Type: PSG/Nitride

Thickness: PSG: 7k $\text{\AA}$   $\pm$  1.4k $\text{\AA}$

Nitride: 8k $\text{\AA}$   $\pm$  1.2k $\text{\AA}$

### WORST CASE CURRENT DENSITY:

9.1 x 10<sup>4</sup> A/cm<sup>2</sup>

## Metallization Mask Layout

# DG506A, DG507A, DG508A, DG509A

## Die Characteristics

### DIE DIMENSIONS:

3810 $\mu$ m x 2770 $\mu$ m
